Agenda

- Sociology/MSc in Digital Sociology: An Introduction
- Teaching and Learning and Assessment
- Why study Sociology/MSc in Digital Sociology at Edinburgh?
- Questions?

Introduction

- The MSc in Digital Sociology is a one-year sociology programme that combines social theory and social research skills.
- It focuses on the sociology of digital society.
- For example, focusing on questions around: digital labour or digitally surveilled/managed labour, social capital, inequality, social movements etc.
- And it teaches methods to study these.
- For example, training in how to carry out: interviews, surveys, quantitative analysis (statistics, data visualisation), computational data collection (e.g. web-scraping, APIs) and analysis (e.g. machine learning).

Social Data Science Pathway

- In 2022 we began offering a cluster of courses in Social Data Science. These include courses in “Computational Text Analysis,” “Computational Sociology,” and a series of other methods workshops in data science techniques.
- In 2025 we launched the Social Data Science Pathway, and students can now be awarded the degree "Digital Sociology with Social Data Science (MSc)".
- The courses provide students with the background knowledge of theoretical and substantive debates in the realm of social data science while also providing students with hands-on skills to collect data and conduct their own analyses in programming languages like R and Python.
- **Unique to this programme:** you can learn to combine **critical sociological analysis** (analysis of power, inequalities, exploitation, knowledge production) in and through **digital and data science tools**.
 - We develop forms of digital and computational sociology that are informed by feminist, queer, antiracist, anti-imperialist and **class critiques**.

Online communication

- How to get data on what people read and say and share online?
- What effects have new online media and platforms had on attitudes, behaviour, and the way people communicate?
- E.g.
 - Gen-Z and the critical politics of TikTok
 - Gender in programming and collaborative programming platform (e.g. Stack Overflow or Github)

Political protest

- How do social movements function online?
- What are the effects of social media on protest and collective behaviour?
- How do we collect data on movements online?

Digital Culture

- Global Digital Culture?
- The formation of communities connecting global and local.
- Rise of a networked society?
- New forms of power? Politics? Identities? Inequalities?

Work and Labour

- The rise of digital labour and the future of work?
- The rise of platform capitalism? Inequality, data, rights?
- Organising and solidarity in a digital economy?
 - Links to the Workers Observatory in Edinburgh

Studying & learning

THE UNIVERSITY
of EDINBURGH

EDINBURGH
Extraordinary futures await

- Lectures
- Reading
- Tutorial discussions
- Course blogs, and other online exercises and activities
- Researching for papers and other assignments (going beyond core readings)
- Consulting with faculty as needed, including Dissertation Supervisor.
- Dissertation: Independent research (fieldwork, interviews, surveys...) with key supervisor

Assessment

- Emphasis on written work:
- Short essays @1200 words
- Long essays @4000 words
- Extensive feedback, suggestions for improvement.
- But also:
 - Small independent research assignments
 - Group work and mini-research teams
 - Peer-review and peer-support
- All courses have at least 2 points of feedback, and feedback for the first is received before the final assessment is due.

Degree structure – MSc Digital Sociology

Year	Semester One	Semester Two
1	<p>Core course: Issues and Concepts in Digital Sociology</p> <p>Chosen Elective</p> <p>Chosen Elective</p> <p>Dissertation Workshop (Sem One)</p>	<p>Core Course: Researching Digital Life</p> <p>Chosen Elective</p> <p>Chosen Elective</p> <p>Dissertation</p> <p>Dissertation Workshop (Sem Two)</p>

Electives

Sociology/Science Technology & Innovation Studies (STIS)

Internet, Society, and Economy

Digital Markets and Society

Humanitarianism and the Media

Research Problems in Drugs and Crime Online

Intimate Relationships

Understanding Technology

Controversies in the Data Society

Globalisation

The Human Factor: Working with Users

Methods

Research Skills in the Social Sciences

Analysis Qualitative Data

Research Design

Statistical Modelling in the Social Sciences

Core Quantitative Methods 1 & 2

Qualitative Methods and Ethnographic Fieldwork

Fieldwork

Field work can be a key part of a sociological dissertation.

We will work with you to develop the appropriate research design for your dissertation.

You will be ideally placed to conduct digital fieldwork: interviews, ethnography, network analysis, for example.

THE UNIVERSITY

Dissertation

- Your own project, developed in conversation with your supervisor.
- A project that uses sociology as a lens to explore digital life, broadly construed.
- A project that incorporates novel research: desk-based, fieldwork, or secondary data sources.
